PURPOSE: To provide a reducing member insertable into a shunt to posteriorly reduce the flow cross section of the shunt. **CONSTITUTION:** A reducing stent 1 inserted into the shunt of an organism is provided with a sleeve-like portion 2. The sleeve-like portion 2 is provided with a wall body having perforations 3, expanded both end sections, and an intermediate range constricted and reduced in diameter. Threads 8 of thronbogen are provided between both expanded end sections on the outside of the sleeve-like portion 2.
